Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 04 January 2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 1-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bond (US 4,762,000) in view of Hitchcock (US 5,829,153). Bond teaches a fluid level indicator (Figures 2-3) comprising indicator rod [26] having first (lower) end adapted to measure the liquid height in a chamber [14] and a second (upper) end having a stopper [40], a tube [12] receiving the indicator rod and having a radially outwardly projecting flange (see especially Figures 2 and 3), a finger-actuatable locking lever [42] lockingly engaged to the flange through biased rotation and selectively restraining movement of the indicator, and a member located between stopper and tube (Figures 2,3).

Bond teaches the claimed invention except for the use of a deformable seal and a handle. Hitchcock teaches a fluid level indicator having a deformable gasket [52] between stopper and tube, and a handle [24] attached to the stopper (Figure 1). It would have been obvious to one having ordinary skill in the art at the time the invention was made to use a deformable gasket and handle as taught by Hitchcock in the invention taught

by Bond to sealingly connect the indicator to the tube and provide a human-graspable interface, since such would prevent fluid loss at the connection and provide easier manipulation of the indicator.

Response to Arguments

2. Applicant's arguments with respect to claims 1-11 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
4. A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

Art Unit: 2855

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Tower (US 2,127,835) discloses a similar locking mechanism; Goldsmith (US 2,620,660) discloses a radially outwardly projecting flange.
